

SUMMARY

An enthusiastic and detail-oriented Data Analyst Intern candidate with strong proficiency in SQL and data visualization tools such as Looker Studio, Tableau, and Power BI. Experienced in transforming complex datasets into actionable insights through clear, data-driven storytelling. Skilled in automating reports and building intuitive dashboards to support strategic decision-making. Familiar with Python (Pandas, Matplotlib) and fundamental data warehousing concepts using MySQL. Passionate about data integrity, analytics, and continuous learning in fast-paced, tech-driven environments.

EXPERIENCE

- Image Classification on Flower Dataset using MobileNetV2

10/2025 - 11/2025

Built an image classification model using MobileNetV2 to classify various types of flowers from a custom dataset. Trained the model from scratch using TensorFlow, including data preprocessing, image augmentation, and performance evaluation. The project aimed to develop a lightweight and efficient CNN model capable of accurately recognizing flower species.
- Sentiment Analysis on Mobile Legends: Bang Bang Reviews from Google Play Store

10/2025 - 10/2025

Conducted sentiment analysis on user reviews of Mobile Legends: Bang Bang collected through web scraping from the Google Play Store. Processed and cleaned textual data, applied Natural Language Processing (NLP) techniques for sentiment classification, and visualized insights to understand user perceptions and feedback trends toward the game.
- Bank Transaction Clustering and Customer Behavior Modeling

09/2025 - 10/2025

Performed customer segmentation using clustering on a bank transaction dataset and built a classification model to predict customer behavior. Applied data preprocessing, feature selection, and evaluation to generate actionable insights for customer targeting strategies.
- Dashboard Supermarket with Excel and Looker Studio

07/2025 - 08/2025

Created an interactive sales performance dashboard using Excel and Looker Studio to analyze one year of transaction data, visualize key metrics, and uncover sales trends for better business decision-making.
